VOTE FOR COLONEL TAYLOR.

Charles L. Taylor should receive the vote of every believer in good municipal government in San Ffancisco. He is the nominee of the regular Republican party of this City and stands for all that the party represents. He is entitled to every oyal Republican vote, on the score of 'the re ularity of his nomination, and is entitled also to the vote of every independent citizen on the score of his character and his eminent services to the people while a member of the Board of Supervisors.

THE NEXT SENATE.

Among the Senators whose terms of office expire on the 4th of next March are to your friends and neighbors. Remind | thirteen Republicans. Political experts concede the certainty that all of these will be returned or that Republican successors will be elected for them except in the case of the Senators from North Carolina and California. It is to be regretted that even the least sanguine of experts should have any doubt concerning this State. The industries of California require protection and it shows a most perverse state of public opinion that there should be any question as to whether or no the California Legislature will send a stanch protection-

NEWS OF FOREIGN NAVIES

The naval arsenal at Foochow is again to be reorganized. It was started on the European plan in the early sixties, with French officers and a number of foreign engineers and me-chanics for a staff engaged to build ships, en-gines and guos. After a few years the foreign-ers were dispensed with and the Chinese con-tinued the work begun, but made no progress, as they simply duplicated ships built years wrights, engineers and other mechanics, with three superintendents, each of whom are to be paid \$1500 a month. Seven professors at a monthly salary of \$320 each are to come out from England to take charge of the navai school located at Foochow.

Messrs. Krupp of Essen have purchased the Germania Ship-Building Works at Kiel and Germania Marine-Engine Works at Tegel, near Berlin. They have also purchased ground at Wilhelmshafen, where they are building works and docks suitable for repairing ironclads and placing engines on board. It is understood the Krupps have taken this step on the suggestion of the Emperor as there is realized. He has told the farment would be the world out twice the farment would be the set them. told the farmers that they would get twice as much for their crops if he were elected, as much for their crops it he were elected, and he has also told the workingmen that their wages would buy just as much with free coinage as they do now. He has made

free coinage as they do now. He has made this so clear that no one can mistake him. Many farmers and workingmen will vote for him because they believe what he tells them. But the things which he promises he cannot fuifill.

Mr. Bryan needs to learn that whatever the experience of the civilized world has found to be the best policy under given circumstances cannot easily be proved to be the worst. It may not be ideal, but it has been adopted because it was better than that which preceded it. If he should happen to be elected he will wish before the end of his term that he had been defeated, and if he is defeated he will thank Providence that he was not called upon to face the disasters which would have followed the free coinage of silver.

capitalists, who, though they believe Bryan's defeat is certain, still care to take no risks, with the result that they are waiting until the decision is rendered, when in every city in this country tusiness enterprises will take on new life, forges will be relighted, factory wheels will turn again, banks will circulate their treasure and workingmen, farmers, artisans, cierks, merchants, middlemen and capitalists will be gin the new epoch in American history filled with courage born of honest enthusias.

capitalists will be gin the new epoch in American history filled with courage born of honest enthusias.

We may never know the damage that Bryan and the repudiationists have done in this country. Every State has lost millions of dol ars since the Populists in Chicago declared for a debased currency. Every capitalist and workingman has shared in this loss. Happily the long struggle is nearly ended. If every voter does his duty on election day the currency question, so far as these United States are concerned, will never again have to be discussed. The questions of National dishonor and National dishonesty will have passed away into thin air, just as some terrible miasma arises and is finally dispelled.

But what a campaign it has been! How the American spirit of freedom, patriotism and loyalty has slood out in every section of every State! Voters everywhere know more to-day than they ever knew before. And they cherish the old fing as never before in our history. All honor to American manhood! All honor to those brave Democrats everywhere who have placed country above party and who are standing shoulder to shoulder for the right with Republicans, a united band of Americans who are concerned only for the salvation of the Nation and the glory of the Republic!

NO BLANK CARTRIDGES.

Why Every Sound-Money Democrat Should Cast His Vote for McKinley.

The argument on free silver at 16 to 1 is closed and there is not a shred of fact or reasleft to justify popular support of a depreciated currency. I am and have been since his nomination opposed to the election of W. J. Bryan. First, as an American, and second, as a Democrat. I recognize the grievances and the just demands of the people, oppose personalities and believe party methods require reconstruction. But this has been the campaign of the non-sequitur as made by the advocates of free silver. Many of the promises are sound, but they are wholly disconnected from the conclusion. The money power has been aggressive and successful, but its victories over the people are not attributable to any legislation or trend of judicial decision affecting the currency.

ple are not attributable to any legislation or trend of judicial decision affecting the currency.

Here is where the non-sequitur comes in. From my point of view the chicago platform is not Democratic, but most radically opposed, to true Democraty. The Indianapolis platform suits me, but the only hope for sound money is in the election of McKin.ey, and, in this State especially, in my opinion, every vote cast for Palmer and Buckner is in effect a vote against Mckinley.

Bryan is said to have won his nomination by declaring in substance that a crown of thorns should not be pressed upon the brow of labor and that humanity should not be crucified upon a cross of gold. These figures, though immediately effective, were not original. It may well be suggested that, at this day, and in this land, the crucifixion of humanity is not possible, but if it were, a cross of gold would be preferable to a cross of silver. The deeper thought, however, is that neither the crown of thorns, nor the cross would have passed into history, had it not been for the great apostle of a debased currency, Judas Iscariot, who sold his Lord and master for thirty pieces of silver. This prototype of modern repudiationists, being pricked with his conscience, appropriately hanged himself, and his thirty pieces of silver were used as a legal tender for the purchase of Aceldama or the field of blood.

McKinley and Hobert stand for Nacing and the conscience, appropriately hanged himself, and his thirty pieces of silver were used as a legal tender for the purchase of Aceldama or the field of blood.
